

SALIMA

ENVIRONMENTAL AND SOCIAL MANAGEMENT PLANS FOR LDF TEACHERS HOUSES CONSTRUCTION PROJECTS 2010/2011

Observations and recommendations were almost the same in all the sites

PMCs were advised to continue monitoring the structures and report any problems to the district authorities

Extension workers and district officials will periodically check the implementation

NAME OF SCHOOL: Nankhata

ZONE: Kanongola

CONSTITUENCY: Salima North

TRADITIONAL AUTHORITY: Mwanza

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Chawira
ZONE: Kanongola
CONSTITUENCY: Salima North
TRADITIONAL AUTHORITY: Mwanza

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Matenje
ZONE: Matenje
CONSTITUENCY: Salima North West
TRADITIONAL AUTHORITY: Khombedza

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going

Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Matenje
ZONE: Matenje
CONSTITUENCY: Salima North West
TRADITIONAL AUTHORITY: Khombedza

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Chilanga
ZONE: Matenje
CONSTITUENCY: Salima North West
TRADITIONAL AUTHORITY: Khombedza

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Sengabay
ZONE: Ngolowindo
CONSTITUENCY: Salima Central
TRADITIONAL AUTHORITY: Maganga

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Kachulu
ZONE: Yambe
CONSTITUENCY: Salima Central
TRADITIONAL AUTHORITY: Kuluunda

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engeneering practices to be employed to ensure traffic diruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Kaphatenga
ZONE: Kaphatenga
CONSTITUENCY: Salima Central
TRADITIONAL AUTHORITY: Kalonga

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going

Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Sakwi
ZONE: Chitala
CONSTITUENCY: Salima Central
TRADITIONAL AUTHORITY: Kalonga

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Chikowa
ZONE: Katelera
CONSTITUENCY: South
TRADITIONAL AUTHORITY: Ndindi

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Ngodzi

ZONE: Chipoka

CONSTITUENCY: South

TRADITIONAL AUTHORITY: Kambalame

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Naliomba
ZONE: Katelera
CONSTITUENCY: South East
TRADITIONAL AUTHORITY: Pemba

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engeneering practices to be employed to ensure traffic diruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Chapita
ZONE: Katelera
CONSTITUENCY: South East
TRADITIONAL AUTHORITY: Kambwiri

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going

Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going

NAME OF SCHOOL: Mtunthama
ZONE: Katelera
CONSTITUENCY: South East
TRADITIONAL AUTHORITY: Kambwiri

Potential environmental impacts	Proposed Mitigation measures	Responsibility	Time Frame
Loss of top soil and vegetation due to brick moulding	Re-vegetation	PMC	On-going
Borrow pit formation	Refill the pits with rubbles. Plant trees in the pits	PMC	On-going
Traffic disruption	Best engineering practices to be employed to ensure traffic disruptions are minimised	PMC	On-going
Soil and water pollution due to remainder of construction wastes, tools. Equipment and temporary infrastructure	Clear construction site and restore vegetation on the site. Land scaping. Safe disposal of the construction wastes.	PMC	On-going
